

RETAILFIX NEARBY

Finding shops on the map

Find shops near you on the map, see their hours and phone number, and get directions.

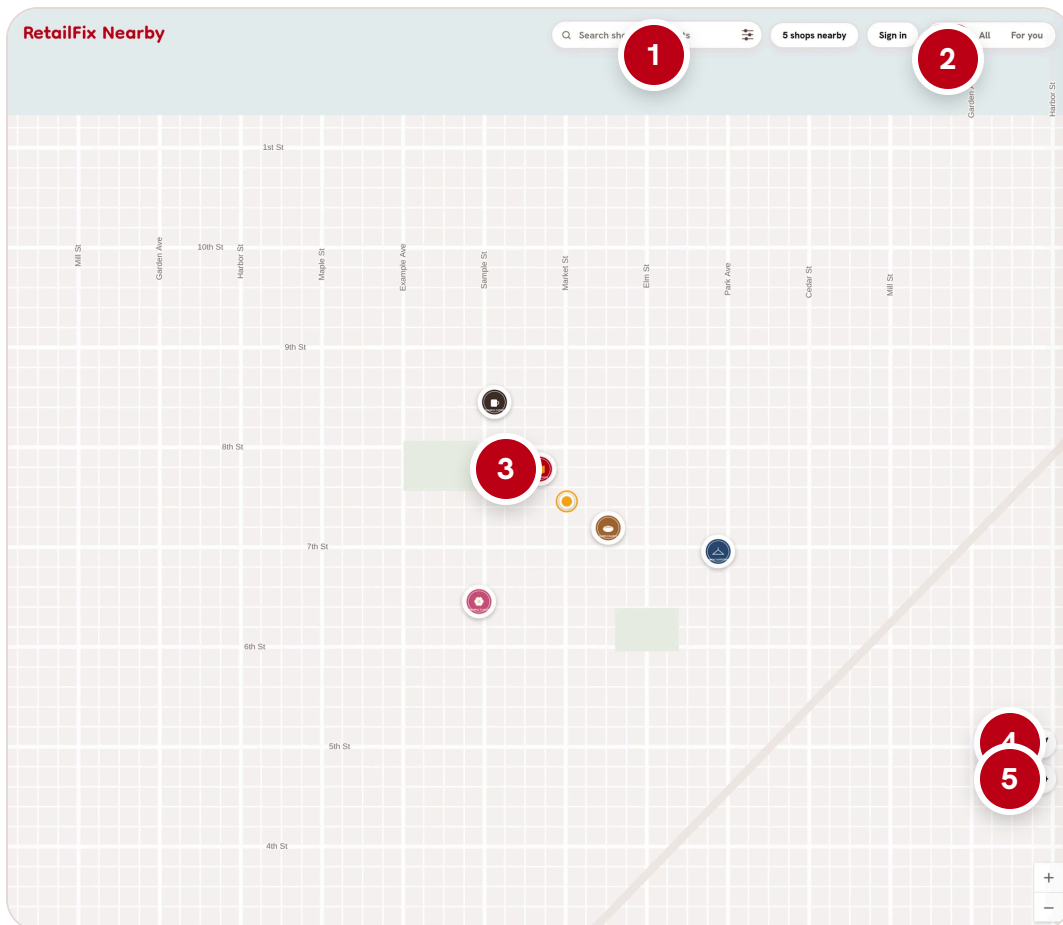

In this guide

1. The map
2. A shop's page
3. Opening hours
4. Show the way
5. The nearest shop
6. Live tracking

1 The map

Allow your location when your browser asks. The map moves to where you are, shown as an orange dot. Without your location, the map shows every shop.

- The search box **1** and the **Map**, **All** and **For you** buttons **2** are at the top.
- Each pin is a shop's logo **3**. Click or tap it to open the shop. Pins close together join into one with a number; click or tap it to zoom in.
- The arrow **4** turns live tracking on and off.
- The target **5** shows the way to the nearest shop.

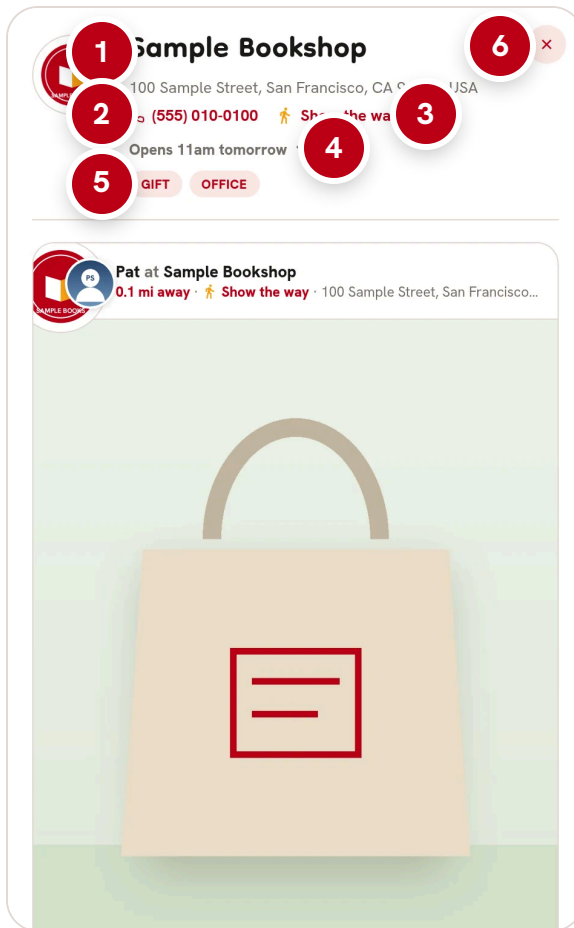

2 A shop's page

On a computer, the shop opens in a panel beside the map. On a phone, it fills the screen.

- The shop's name **1** and address.
- Click or tap the phone number **2** to call.
- **Show the way** **3** draws the route on the map.
- Whether it's open **4**, such as **Open until 6pm**.
- What it sells **5**.
- The X **6** closes the page.

Below are the shop's posts, with up to three live offers first.

3 Opening hours

Click or tap the open line **1** to see the whole week.

Opens 11am tomorrow ^

1

Sunday	11am-5pm
Monday	10am-6pm
Tuesday	10am-6pm
Wednesday	10am-6pm
Thursday	10am-8pm
Friday	10am-8pm
Saturday	9am-8pm

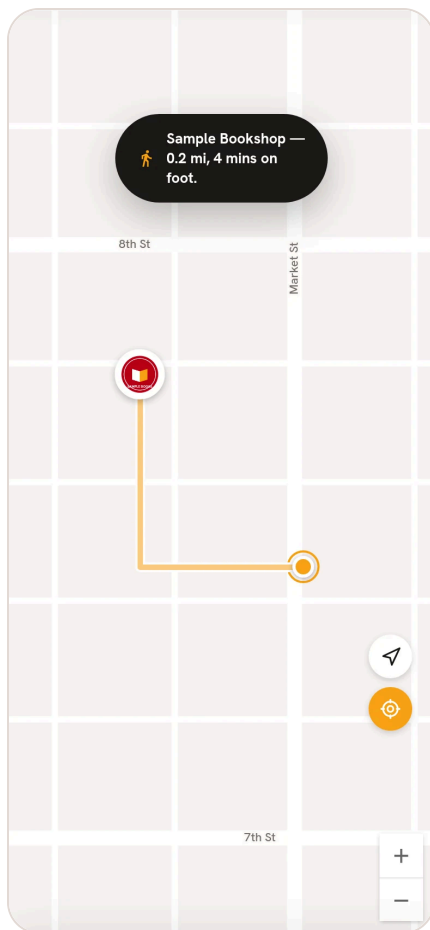

4

Show the way

On a phone, the shop's page closes and the route appears on the map. A message says how far it is and how long it takes.

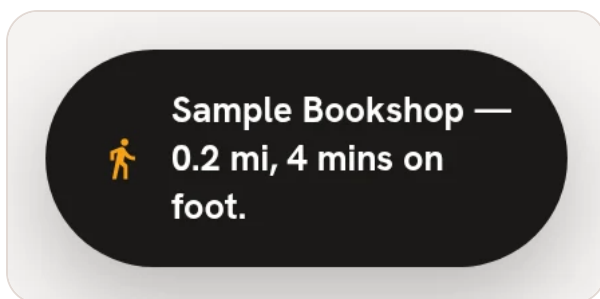

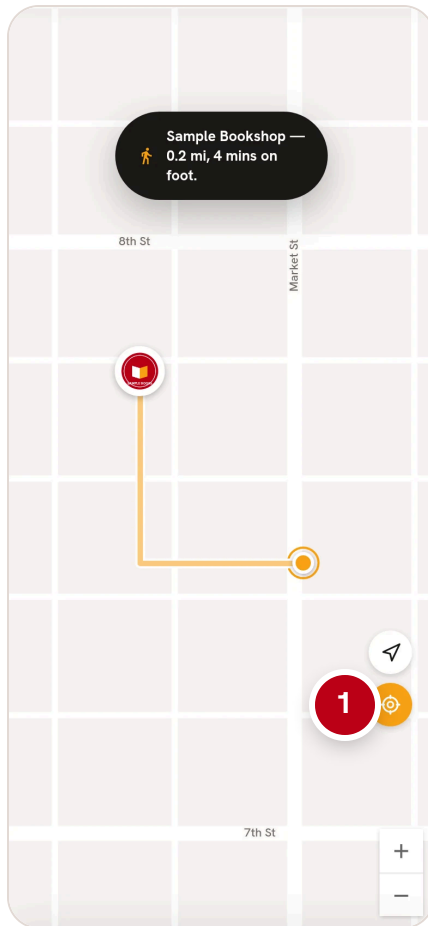

On a computer, the route appears beside the shop's page, and **Show the way** changes to **Hide the way**.

You're shown the walking route when the shop is 2.5 miles away or less, and the driving route when it's further.

5 The nearest shop

The target button **1** shows the way to the nearest shop on the map. It follows your search and filters, so it finds the nearest match. Tap it again to hide the route.

6 Live tracking

With live tracking on, your spot on the map moves as you walk, and distances update. Tap the arrow again to turn it off.

Turn on location to use live tracking. means your browser isn't sharing your location.
