

RETAILFIX NEARBY

Perks

Scratch a card to reveal an in-store perk, which saves it for you, and show its QR code at checkout.

In this guide

1. Scratch to reveal
2. Your perk
3. Your perks in Saved
4. Used and ended
5. Show code
6. Remove one

1 Scratch to reveal

A post with an offer has a scratch card . Signed out, it says **Sign in to reveal**. Signed in, scratch it with your finger or mouse.

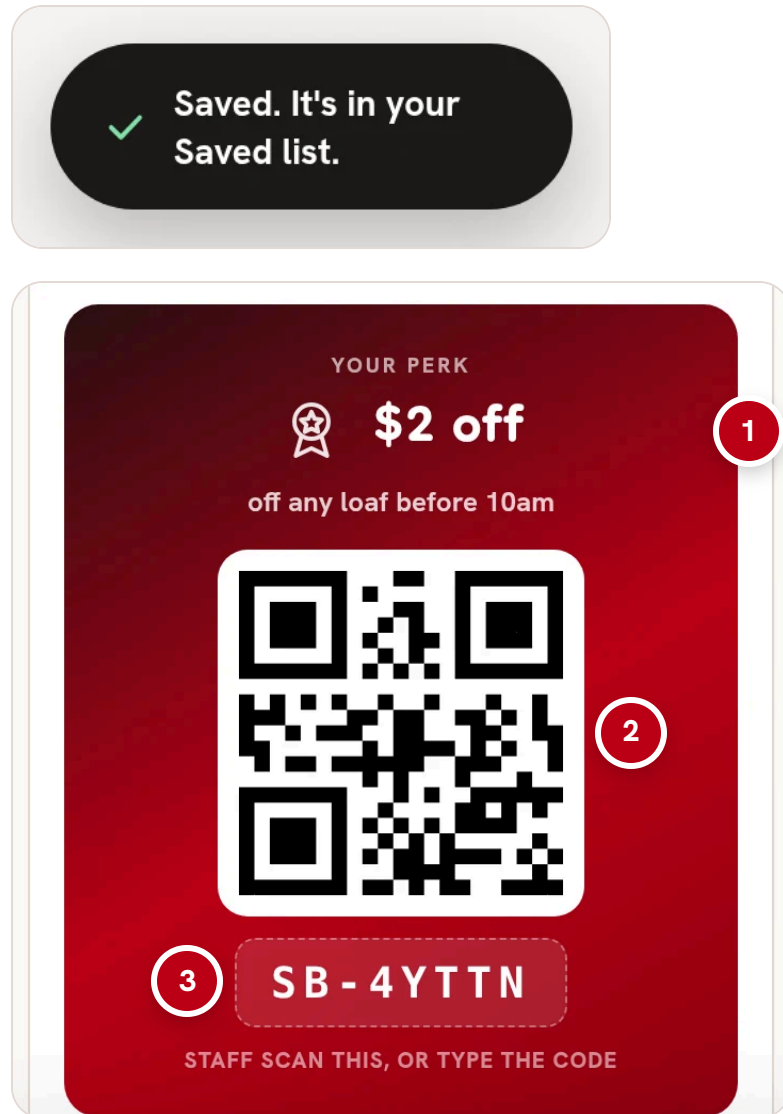

Nearly gone on a card means most of a limited offer has been used.

2 Your perk

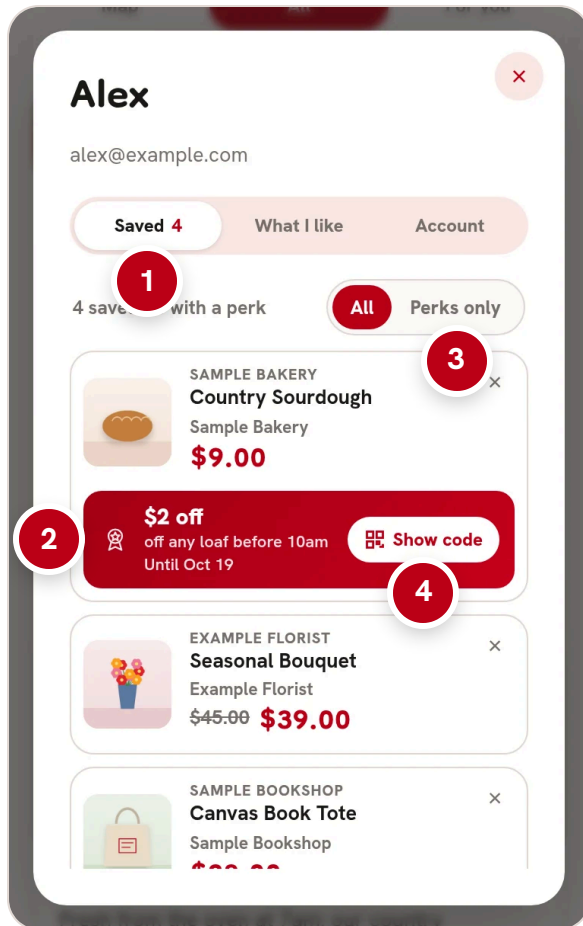

Under the foil is your perk **1**, with its QR code **2** and its code **3**. Scratching saves it for you: it says **Saved. It's in your Saved list.**

At checkout, staff scan the QR code, or type the code under it. The code is yours alone.

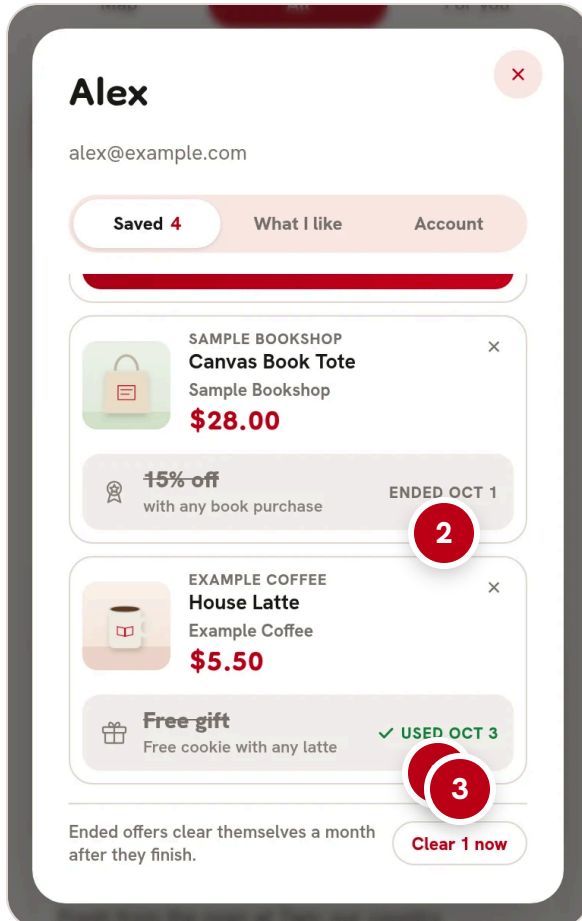

3 Your perks in Saved

Tap your name at the top, then **Saved** 1. A saved post with a perk shows it underneath 2. **Perks only** 3 shows just those. **Show code** 4 turns a perk over to its QR code.

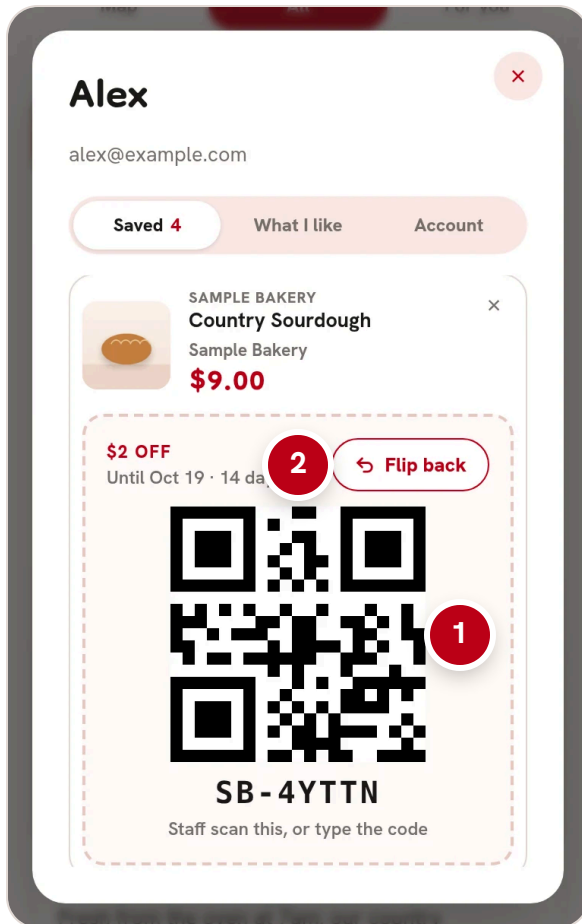

4 Used and ended

- **Used** 1 shows the date you used it.
- **Ended** 2 shows the date it finished.
- Ended offers clear themselves a month after they finish. **Clear now** 3 removes them sooner.

5 Show code

The QR code **1** is what staff scan at checkout, with the code under it to type in. **Flip back** **2** turns it back.

6 Remove one

The X on a saved item asks **No longer want this?** Tap **Remove** 1.
